

# How to succeed in Sustainability

## Master your ESG Strategy with IBM Envizi

ESG reporting presents several challenges for companies:

- ▶ **Navigating multiple frameworks**
- ▶ **Constantly evolving regulations**
- ▶ **Ensuring data quality**

These issues underscore the need for **a singular, advanced tool** capable of streamlining ESG reporting, that will free up your time, and give you a complete view of where you're at regarding your sustainability goals.

### An all-purpose solution

IBM Envizi can **set you up for success** against the hurdles ESG reporting will throw at you:

#### Keep a precise record of the carbon emissions from all your activities and locations and report on them

Get complete visibility of your carbon emissions across your different offices, manufacturing, and your supply chain.

#### Create reports that meet the requirements of different ESG reporting standards

Envizi supports various reporting frameworks, including things like Global Reporting Initiative (GRI), the UN Global Compact, ISO 26000, and the B Corp Certification.

#### Set and monitor progress towards science-based research targets

Using scientific research as a base, you can work towards reducing your carbon emissions and regularly check how well you're doing in meeting those goals. These could be being more energy efficient, using renewable energy, or a reduction in greenhouse gas emissions.

#### Make data-driven decisions to improve environmental performance

Envizi can identify trends, inefficiencies, and areas that need improvements. Certain processes may be more energy efficient than others. You can use this information to reduce your environmental impact.

### People, processes, and technology

IBM Envizi offers the technology to solve the ESG equation, while Logicalis can provide people, and help support processes.

We help customers with their wider sustainability journey:

- ▶ **Contribute to the development of a business case for improvement**
- ▶ **Identifying areas for future improvement**
- ▶ **Provide an overview of expected levels of benefit**

#### Ready to transform the way you handle ESG?

Reach out to a member of our team today and **take the first steps** of your journey today.
