

Carbon Reduction Plan

30 September 2026

Carbon Reduction Plan

Supplier name: Logicalis International (Logicalis)

Publication date: 30 September 2026

Commitment to achieving Net Zero

Logicalis has committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022 (FY22)			
Logicalis established a baseline for scope 1,2 & 3 carbon emissions in 2022			
Emissions	Total (tCO₂e)		
	FY26 (Current)	*FY26	FY22 (Baseline)
Scope 1	741	899	1166
Scope 2 (market-based)	2 628	2 925	3105
Scope 2 (location-based)	2 094	2 810	2781
Scope 3			
<i>Category 1: Purchased goods and services</i>	103 802	104 135	164 306
<i>Category 2: Capital goods</i>	1 084	810	3559
<i>Category 3: Fuel- and Energy-Related</i>	522	646	421
<i>Category 4: Upstream transport</i>	4 670	4 392	4004
<i>Category 5: Waste</i>	1 700	1 720	1848
<i>Category 6: Business travel</i>	813	3 465	580
<i>Category 7: Employee commuting</i>	7 892	8 076	8726
<i>Category 8: Upstream leased assets</i>	0	0	0
<i>Category 9: Downstream transport</i>	234	220	201
<i>Category 10: Processing of sold products</i>	0	0	0
<i>Category 11: Use of sold products</i>	13 847	13 946	10 561
<i>Category 11a: Use of sold products, excluding sale of fossil fuels</i>	13 847	13 946	10 561
<i>Category 11b: Sale of fossil fuels</i>	0	0	0
<i>Category 12: End-of-life treatment of sold products</i>	5 055	5 093	13 054
<i>Category 13: Downstream leased assets</i>	0	0	0
<i>Category 14: Franchises</i>	0	0	0
<i>Category 15: Investments</i>	0	0	0
<i>Other: Use-phase emissions from transmission or distribution of fossil fuels (not sold) by the company</i>	0	0	0
Scope 3 Emissions	139 710	142 503	207 258

Scope 1,2 & 3 emissions (market-based)	142 544	146 327	211 529
Scope 1,2 & 3 emissions (location-based)	143 079	146 212	211 205

1. The emissions data was compiled in alignment with the GHG Protocol Corporate Standard. The GHG inventory aligns with the requirements set by the SBTi for transparent reporting on progress towards our science-based targets.

2. The carbon emissions data presented in the table has not been audited and should not be considered as an assurance of the accuracy and completeness of such information.

Emissions reduction targets

The Science Based Targets Initiative (SBTi) has validated the science-based greenhouse gas emissions reductions target(s) for Logicalis. The targets are as follows:

Scope 1 & 2 targets:

- Reduce absolute scope 1 and 2 GHG emissions by 50% by FY2030 from an FY2022 base year (01 March 2021 – 28 February 2022).
- Reduce absolute scope 1 and 2 GHG emissions 90% by FY2050 from a FY2022.

Scope 3 targets:

- Have 85% of suppliers by spend covering purchased goods and services will have science-based targets by FY2028.
- Reduce absolute scope 3 GHG emissions 90% by 2050.

In addition to the SBTi targets, Logicalis has committed to:

- Have 100% of our operations powered by renewable energy by 2030.

Carbon Reduction Plan

Scope 1 and 2 emissions:

To meet our near-term targets, Logicalis will implement location-specific carbon reduction plans, tailored to each site's operating context. This new approach enables us to customize our initiatives based on the unique energy profile of each location, focusing efforts on the locations with the highest emissions to maximize our impact. The measures to reduce emissions include:

- Increasing the switch to renewable energy.
- Implementing energy efficiency initiatives to lower overall energy usage.
- Reducing the office footprint where feasible.
- For operations with mobile fleets, switch to electric or hybrid vehicles as contracts end.

Scope 3 emissions

- Direct engagement with suppliers responsible for 85% of Logicalis's revenue by spend to ensure they have SBTs in place by 2028.
- Collect product carbon data from suppliers to improve Scope 3 emissions data accuracy.

Carbon Reduction Projects

The following environmental projects have been completed or implemented in some of our operations across the world for FY26 reporting year:

Operation	Carbon Reduction Initiatives
UK, Channel Islands and Ireland	<ul style="list-style-type: none">• Logicalis is committed to improving energy efficiency in pursuit of our near and long-term decarbonization targets validated by the Science-Based Targets initiative (SBTi). These improvements will be delivered through optimizing our office. At the beginning of FY26, one location in Guernsey was closed so a reduction in total energy consumption will be seen in FY26.• During FY26, we improved energy efficiency at the Guernsey data center by installing cold aisle containment and advanced power monitors. The containment system isolates cold supply air from hot server exhaust to optimize airflow and reduce cooling energy demand, while the power monitors provide real-time visibility into consumption patterns to track and optimize power usage.
Germany & Portugal	<ul style="list-style-type: none">• Prioritised fleet emissions reductions through vehicle transition strategies and continued use of renewable electricity.
US	<ul style="list-style-type: none">• Logicalis US made significant strides in FY26 by switching to Green Power Pass (GPP) ie. renewable electricity in two data centre locations.
South Africa	<ul style="list-style-type: none">• Implemented shutdown procedures and HVAC optimisation, reviewed opportunities to reduce the Johannesburg office footprint.
APAC	<ul style="list-style-type: none">• Implemented office-wide LED lighting upgrades across multiple sites and introduced behavioural energy-saving measures such as switching off lighting during lunch period in Indonesia.• Relocated the Cyberjaya office to a green building with a smaller floor area, reducing the overall property footprint and expected energy consumption.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Nick Zinzan
Head of ESG, Logicalis International
